Mobile Support Bar

One handed Stability and Maneuverability

When a cane is not enough

and a walker is too much

The Walker Problem

- Walkers are wide and cumbersome;
- they force your weight ahead of your center of gravity
- While a curb ramp can make the transition from sidewalk to street easier, its incline may set a walker, or rollater moving too fast and create a feeling of instability.
- Life is not flat, it includes many curbs, thresholds and inclines

Solution: Roll Control (resistance)

- Won’t roll away - roll away resistance, smoothly glides, but traction design keeps you in control. On sloped surfaces, side operation keeps support when you want it, not like a walker than pulls you down . Leaning hard increases roll resistance. …patent pending system

- The Mobile Support Bar provides a secure and stable platform
- Allows the mobility-challenged to travel easily and comfortably over multiple types of terrain, up and downstairs and into confined spaces

Go where you want

- not just where a walker will let you go
- Go out - theatre, restaurant, family gatherings, church,
- Visit friends without fear or embarrassment

Lightweight & Strong

- At 4 1/2 pounds it is 1/2 the weight of a standard walker,
- 1/3 the weight of rollator
- Easy to lift over obstacles
- Folds up for stashing in a car, bus or airplane

Anti-roll

-

Patent Pending

Do more at home

Cooking, vacuuming, wood working, gardening

With a strong, stable support always at your side

You can get back to doing the everyday things you used to do

Makes it easier to do chores

- A cane does not give you the stability to also wield a vacuum. MSB does.

Be Independent

- Carry on – multiple bags, drinks, even grand kids
- Remains portable and stable while Carrying items leaving hands available
- Won’t roll away - roll away resistance, smoothly glides, but traction design keeps you in control. On sloped surfaces, side operation keeps support when you want it, not like a walker than pulls you down . Leaning hard increases roll resistance. …patent pending system
- Hands-free brake
- Folds up and to easily Fit into overhead bin of airplane.

Maneuverability

Narrow enough to get through –

- airplane aisles, movie theatre seats, restrooms

Designed by people who actually use walkers
• For people on the go

Stow on your cart when shopping

Carry on –
makes it easy to
carrying grocery bags

Make gravity your friend

- MSB with its heavy-duty hand bar allows you to grab more than a flimsy handle
- Perfect for getting up from a chair or for balanced standing rest

Substantial wide hand hold

Use at your side to stand erect/upright:

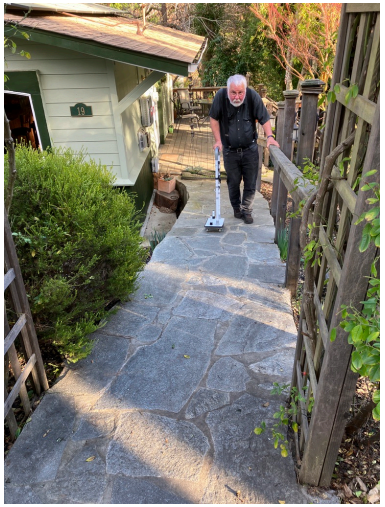
safer, less stress than leaning forward with a walker

Roll in front operation provides full support while maneuvering through narrow aisles, doorways

Across the front usage gives two arm support when standing

Go where you want to go, when you want to

- *Don’t let fear of losing your balance keep you from going out*

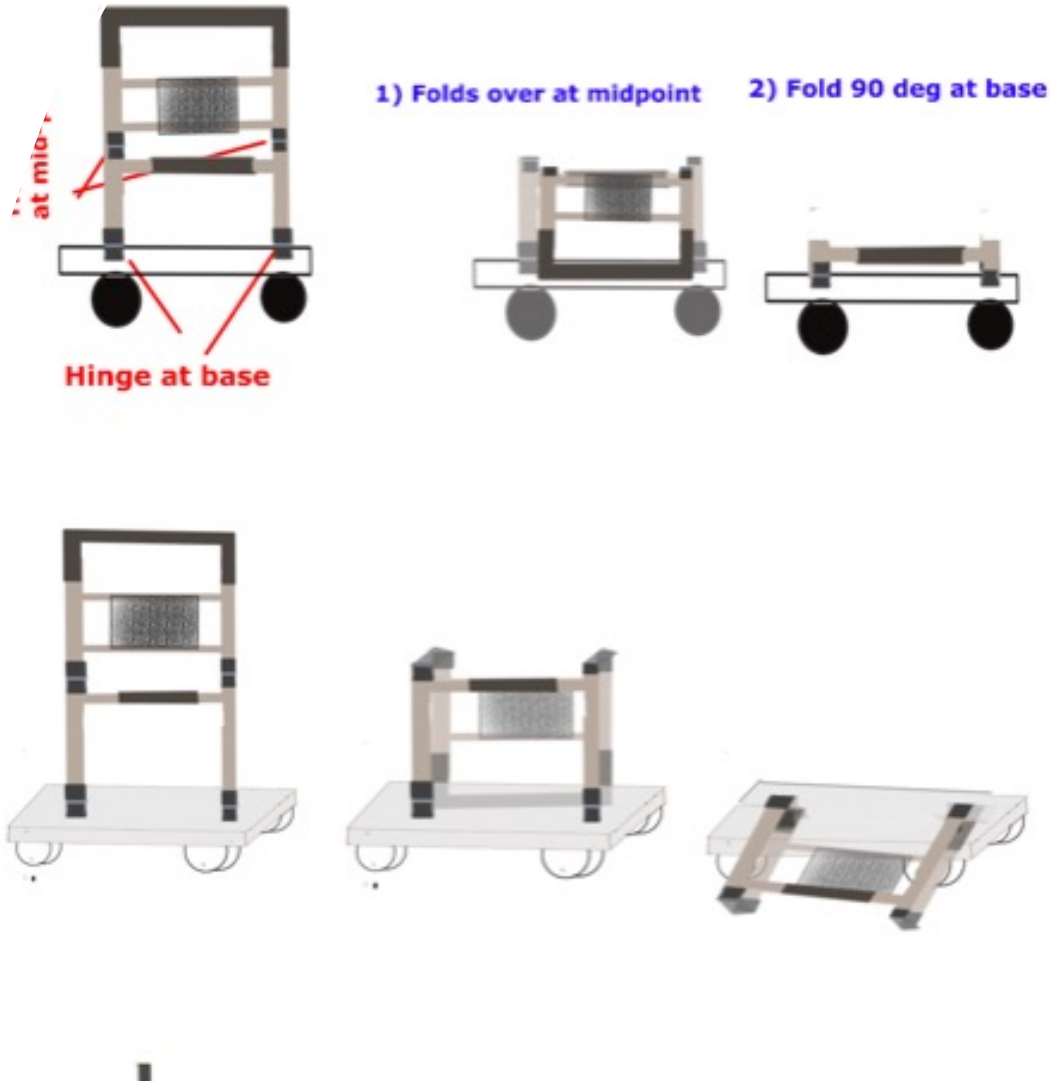


Security Safety Stability

Mobile Support Bar

It folds

- Patent pending



- A Platform you can lean on
- Even take your grandchild for a ride

2.21.24 notes/names

- 2.21
- Grab bar or safety rail – toilets
-
- Logo – GO O is a wheel
- GO-Along moves at your pace – roll control means it can’t roll away from you
- Spin limited
-
- Go-ster
- GO-buddy – the rolling sidekick for getting around
- Get Around with ease and confidence
-
- Feel and look confident
-
- Tilt and glide gives you control and traction over varying surfaces, grass, gravel or dirt where a cane would make a hole in the ground or just slide off
-
- When you come to steps with a rollator or walker you are stopped
- Stairs are an obstacle for rollators and walkers
- Even with a cane they are precarious
-
- GO provides At your side stand-up support
- with
- Fingertip maneuverability to change direction, get yourself around corners and through narrow aisles or hallways
-
-
- Always there, always ready
- Easy to stow and retrieve from car
- Easy to GO
-
- When something/terrain/the situation says no – you say go
-
- Instead of NO – say GO
-
- The GO-mobile acts as an extra railing that goes along with you to provide balance and stabiity

It’s under your control

- It rolls
- It stops
- It brakes

MSRP

$79 - $129
